

Syed Muaarij Nadeem

I am an enthusiastic and detail-focused software engineering student with a solid grasp of programming fundamentals, data structures, object-oriented design, and both web and mobile full-stack development. I have hands-on experience working on practical projects using technologies like Flutter, Node.js, and Firebase. I thrive in collaborative environments and am driven by a passion for creating solutions that address real-world challenges. My objective is to be part of meaningful software initiatives while continuously growing as a developer.

EDUCATION

COMSATS University Islamabad, Lahore Campus	
– Bachelors in Software Engineering	2023-2027
BISE Lahore	
– FSc. (Pre-Medical)	2020-2022
BISE Lahore	
– Matriculation (Bio Sciences)	2018-2020

PROJECTS

Travelling Diary	Fall 2023
A JavaFX GUI-based travel planner using OOP concepts where users can explore cities, find tourist spots, restaurants, and hotels with detailed info, images, and reviews. Great for planning trips interactively.	
Harvest Hustle	Spring 2024
A C++ console-based game utilizing Data Structures and Algorithms like trees and linked lists. Players navigate levels of increasing difficulty, harvesting points in either quick play or adventure mode.	
HMS (Hotel Management System)	Fall 2024
A robust SQL-based system covering all hotel operations including guest check-ins, room management, staff records, services, orders, and billing. It demonstrates core database design and query implementation.	
Ease to Cure	Spring 2025
A web-based medicinal information system using HTML, CSS, JS, Node.js, and Firebase. Users can search medicines, view health charts, and leave reviews, while admins manage data, feedback, and authentication.	
Echoza	Spring 2025
A feature-rich Flutter app with Firebase backend where users record or upload audio/videos and apply real-time noise suppression and voice enhancement. Includes history tracking, profile management, premium features, and Google Ads.
